

The Blue Collar Millionaires Tools and Soft Ware Cheat Sheet

A Handy Crib Sheet with Useful Tools, software and links,

We all get used to our favourite tools, and develop a list of our own for specific jobs. I use an outsourcer now for a lot of my graphics work, but in the beginning I wanted to do everything myself.

Like wise with the tools we all have specific things we prefer

I have outlined some basic but extremely useful tools, some completely free, some with a paid option, and some that you just have to pay for, either monthly or as a one off.

Tools online are like any tools off line

They Are designed to make you more efficient, and to help you make better use of your time.

I hope these are as beneficial to you as they are to me.
